PATTERN

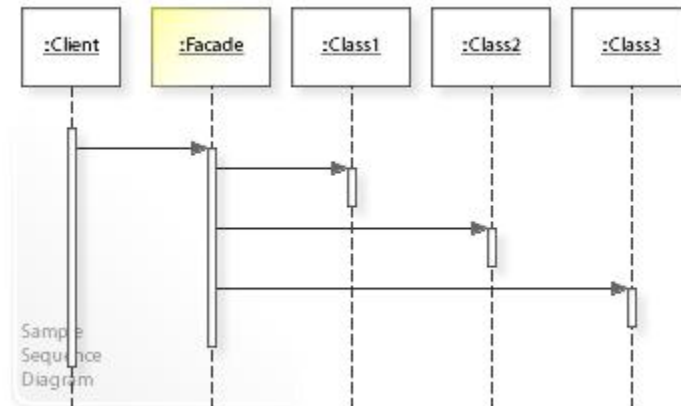

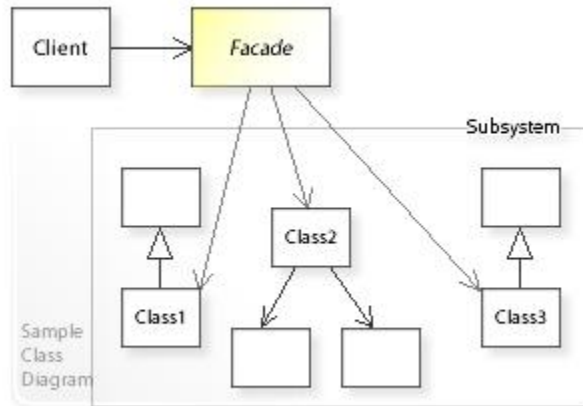

Facade defines a higher-level interface that makes the subsystem easier to use

What is solves?

- A simple interface for a complex system.
- Provides entry points to each level of software
- Poorly designed systems

Facade UML

Facade

Travel Agent

- Knows the responsibilities of each sub system
- Hands the client's request to the appropriate sub system

Sub System

Airline Hotel Rental Car

- Performs a specific task
- Doesn't have reference to the facade.

Code.
